

Специальный выпуск
К 80-летию уравнения Ландау–Лифшица
Ответственные за выпуск Б.А. Иванов и А.С. Ковалев

J. Rychlý, P. Gruszecki, M. Mruczkiewicz, J.W. Klos, S. Mamica, and M. Krawczyk

Magnonic crystals — prospective structures for shaping spin waves in nanoscale (959-975)

C.S. Davies and V.V. Kruglyak

Graded-index magnonics (976-983)

Andrei B. Bogatyrev, and Konstantin L. Metlov

Magnetic states in multiply-connected flat nanoelements (984-988)

Oksana V. Sukhostavets¹, Julian M. Gonzalez¹, and Konstantin Y. Guslienko^{1,2}

Effective magnetization damping for a dynamical spin texture in metallic ferromagnet (989-996)

В.Г. Барьяхтар, А.Г. Данилевич

Диссипативная функция ферромагнетика и теория кинетических уравнений Онсагера (997-1000)

C.E. Zaspel, and V.E. Kireev

Vortex-antivortex dynamics driven by spin-torque in a nanocontact (1001-1008)

G.M. Wysin

Vortex dynamics in thin elliptic ferromagnetic nanodisks (1009-1023)

D.A. Bozhko^{1,2}, P. Clausen¹, A.V. Chumak¹, Yu.V. Kobljanskyj³, B. Hillebrands¹, and A.A. Serga¹

Formation of Bose–Einstein magnon condensate via dipolar and exchange thermalization channels (1024-1029)

S. Mamica

Vortices in two-dimensional nanorings studied by means of the dynamical matrix method (1030-1042)

Sarah Schroeter and Markus Garst

Scattering of high-energy magnons off a magnetic skyrmion (1043-1053)

Scott A. Bender

Thermoelectric spin transport through ferromagnetic heterostructures (1054-1062)

Sunjae Chung^{1,2}, S. Majid Mohseni³, Anders Eklund⁴, Philipp Dürrenfeld¹, Mojtaba Ranjbar¹, Sohrab R. Sani², T. N. Anh Nguyen^{2,5}, Randy K. Dumas¹, and Johan Åkerman^{1,2}

Magnetic droplet solitons in orthogonal spin valves (1063-1068)

М.Л. Панкратова¹, А.С. Ковалев^{1,2}

Модель обменного смещения в трехслойной структуре ФМ/АФМ/ФМ (1069-1076)
