

<i>M.H. Wagner, V.H. Rolón-Garrido</i> — Recent advances in modeling of polymer melt rheology (<i>in English</i>)	603
<i>M. Barczewski</i> — Flow instabilities in polymer melt extrusion. Part I. Types and characteristics of flow instabilities	612
<i>J. Gonzalez-Gutierrez, P. Oblak, Z.M. Megen, I. Emri</i> — Viscosity and creep compliance of polyoxymethylene copolymers of various average molecular weights (<i>in English</i>)	620
<i>I. Fortelný, J. Jůza</i> — Flow-induced coalescence: arbitrarily mobile interface model and choice of its parameters (<i>in English</i>)	628
<i>R. Steller</i> — Novel models for description of steady shear flow curves of non-Newtonian liquids	636
<i>J. Iwko, R. Steller, R. Wróblewski, J. Kaczmar</i> — Experimental verification of computer model for polymer plastication process in injection molding (<i>in English</i>)	644
<i>S. Różańska</i> — Rheological properties of aqueous solutions of polyacrylamide and hydroxyethylcellulose in extensional and shear flow	657
Rapid Communications	
<i>J. Krajenta, A. Pawlak, A. Gałęski</i> — Formation of polypropylene nanofibers by solid state deformation during blending with molten polyethylene (<i>in English</i>)	664
<i>R. Śliwa, M. Oleksy, M. Heneczkowski, R. Oliwa, G. Budzik, B. Kozik, O. Markowska, A. Strachota</i> — Flame resistant hybrid epoxy composites (<i>in English</i>)	667
