

Vol. 24, No. 3, 2015

Counterflow Combustion in Conditions of Fluid-Dynamic Instability: Influence of Reaction Conditions on Finger Parameters <i>A. P. Aldushin and T. P. Ivleva</i>	107
Combustion of Layered SHS Systems: Thermal Conditions at the Interface <i>O. D. Boyarchenko, S. V. Kostin, P. M. Krishenik, S. A. Rogachev, and A. E. Sytschev</i>	115
Silicon Carbide Ceramics SHS-Produced from Mechanoactivated Si–C–B Mixtures <i>A. Yu. Potanin, N. V. Zvyagintseva, Yu. S. Pogozhev, E. A. Levashov, S. I. Rupasov, D. V. Shtansky, N. A. Kochetov, and D. Yu. Kovalev</i>	119
Thermal Explosion in Ti–Ni Blends: Influence of Mechanocomposite Size <i>O. A. Shkoda</i>	128
SHS in the Ni–Al System: Influence of Mechanical Activation, Vacuum Heat Treatment, and Ambient Pressure <i>N. A. Kochetov and N. V. Markin</i>	132
Nitride-Based Materials SHS-Produced from Ferroalloys: I. Potential Application as Catalysts, Abrasives, and in Film Heaters <i>L. N. Chukhlomina, B. Sh. Braverman, and Yu. M. Maksimov</i>	135
Aluminum Oxynitride by SHS in Chemical Furnace <i>I. P. Borovinskaya, T. I. Ignat'eva, V. N. Semenova, and E. A. Chemagina</i>	142
Structural and Magnetic Properties of SHS-Produced Multiphase W-Type Hexaferrites: Influence of Radiation-Thermal Treatment <i>E. P. Naiden, V. A. Zhuravlev, R. V. Minin, V. I. Suslyaev, V. I. Itin, and E. Yu. Korovin</i>	148
High-Quality Cemented Carbides on the Basis of Near-Nano and Coarse-Grain WC Powders Obtained by Self-Propagating High-Temperature Synthesis (SHS) <i>A. A. Zaitsev, V. I. Vershinnikov, I. Konyashin, E. A. Levashov, I. P. Borovinskaya, and B. Ries</i>	152
Protective Mo ₂ NiB ₂ –Ni Coatings by Centrifugal Metallothermic SHS <i>V. N. Sanin, D. M. Ikornikov, D. E. Andreev, V. I. Yukhvid, B. Derin, and O. Yücel</i>	161

Brief Communications

Porous Ti–Co Alloys and Their Joining with Titanium by SHS cladding <i>A. E. Sytschev, O. K. Kamynina, L. M. Umarov, A. S. Shchukin, and S. G. Vadchenko</i>	171
Coflow Combustion of Bulk-Density and Granulated Ni–Al Mixtures <i>B. S. Seplyarskii, R. A. Kochetkov, and N. M. Rubtsov</i>	174
