Vol. 24, No. 4, 2015

Centrifugal SHS of cast Ti–Al–Nb–Cr Alloys <i>V. I. Yukhvid, D. E. Andreev, V. N. Sanin, Zh. A. Sentyurina, Yu. S. Pogozhev, and E. A. Levashov</i>	177
Counterflow Infiltration Combustion in Conditions of Fluid-Dynamic Instability: Fingering in Low Gas Flow <i>A. P. Aldushin and T. P. Ivleva</i>	182
TiC–Al Interpenetrating Composites by SHS Pressing <i>A. P. Amosov, A. F. Fedotov, E. I. Latukhin, and V. A. Novikov</i>	187
Synthesis and Heat Treatment of Sprayed High-Temperature NiAl–Ni <sub>3</sub> Al Coatings by In-Flight Combustion Synthesis (CAFSY) <i>A. Marinou, G. Xanthopoulou, G. Vekinis, A. Lekatou, and M. Vardavoulis</i>	192
Nitride-Based Materials SHS-Produced from Ferroalloys: II. Silicon Nitride as a Support for Ag-Containing Catalysts for Partial Oxidation of Ethylene Glycol <i>L. N. Chukhlomina, B. Sh. Braverman, and Yu. M. Maksimov</i>	203
Structural Heredity of Alloys Produced by Centrifugal SHS: Influence of Remelting Temperature <i>V. V. Sanin, Yu. A. Anikin, V. I. Yukhvid, and M. R. Filonov</i>	211
Magnesiothermic SHS of Boron Carbide in Conditions of Temperature Gradients <i>V. I. Ponomarev, I. D. Kovalev, V. I. Vershinnikov, D. Yu. Kovalev, and S. V. Konovalikhin</i>	216
Combustion Synthesis of Hetero-Modulus SiAlON–BN Composites <i>K. L. Smirnov</i>	220
Evolution of Gases during SHS of TiC <i>A. S. Shchukin and S. G. Vadchenko</i>	227
Fine-Grained Co–Cr–Mo Alloy by Combined Use of SHS and Thermomechanical Treatment <i>Yu. R. Kolobov, S. A. Bozhko, O. A. Golosova, V. N. Sanin, D. M. Ikornikov, and V. I. Yukhvid</i>	231
Fine Structure of SHS-Produced Co–Cr–Mo Alloy <i>S. S. Manokhin, Yu. R. Kolobov, V. N. Sanin, S. A. Bozhko, D. M. Ikornikov, and V. I. Yukhvid</i>	236
Structural and IR study of Ni <sub>0.5-x</sub> Cd <sub>x</sub> Zn <sub>0.5</sub> Fe <sub>2</sub> O <sub>4</sub> <i>M. R. Patil, M. K. Rendale, S. N. Mathad, and R. B. Pujar</i>	241

## Brief Communications

Thermal Explosion in Ti–Ni Blends: Role of Inner Mechanocomposite Structure <i>O. A. Shkoda</i>	246
Fused TiC by Electrothermal Explosion under Pressure <i>V. A. Shcherbakov, V. T. Telepa, and A. V. Shcherbakov</i>	251
