

GEOCHEMICAL JOURNAL

Volume 50

Number 1

2016

CONTENTS

Special Issue: Evolution of the early solar system: Presolar cosmochemical fingerprints and the formation of watery rocky planets

- T. USUI, A. BOUVIER, J. I. SIMON and N. KITA: Preface: Evolution of the early solar system: Presolar cosmochemical fingerprints and the formation of watery rocky planets 1

INVITED REVIEWS

- C. FLOSS and P. HAENECOUR: Presolar silicate grains: Abundances, isotopic and elemental compositions, and the effects of secondary processing 3
- H. GENDA: Origin of Earth's oceans: An assessment of the total amount, history and supply of water 27
- L. QIN and R. W. CARLSON: Nucleosynthetic isotope anomalies and their cosmochemical significance 43

ARTICLE

- H. KUROKAWA, T. USUI and M. SATO: Interactive evolution of multiple water-ice reservoirs on Mars: Insights from hydrogen isotope compositions 67

Regular Issue

ARTICLES

- Y. DUAN, M. DUAN, T. SUN, J. HE, Y. WU, X. CAO and Y. ZHAO: Thermal simulation study on the influence of coal-forming material on the isotopic composition of thermogenic coalbed gas 81
- J. PARK, C. H. JEONG, K. NAGAO, J. H. YANG, H. SUMINO, K. H. KIM, M. S. KIM, J. I. LEE, C. H. PARK, Y. K. KOH and S. D. HUR: Hydrochemistry and noble gas geochemistry of geothermal waters in Chungcheong Province, South Korea 89
