

Journal of Mineralogical and Petrological Sciences

August 2016

Published by Japan Association of Mineralogical Sciences

Volume 111, Number 4

ORIGINAL ARTICLES

- 241** The K_2CO_3 fusion curve revisited: New experiments at pressures up to 12 GPa. *M. WANG, Q. LIU, T. INOUE, B. LI, S. POTTISH, J. WOOD, C. YANG and R. TAO*
- 252** In situ observation, X-ray diffraction and Raman analyses of carbon minerals in ureilites: Origin and formation mechanisms of diamond in ureilites. *Y. NAKAMUTA, F. KITAJIMA and K. SHIMADA*
- 270** Ti-rich biotite in spinel and quartz-bearing paragneiss and related rocks from the Mogok metamorphic belt, central Myanmar. *Ye Kyaw Thu, Maw Maw Win, M. ENAMI and M. TSUBOI*
- 283** Hadean detrital zircon in the North China Craton. *Z. LI, B. CHEN and C. WEI*

LETTERS

- 292** Cation distribution in Mg–Zn olivine solid solution: a ^{29}Si MAS NMR and first-principles calculation study. *M. KANZAKI and X. XUE*
- 297** Self-diffusion of water molecules confined between quartz surfaces at elevated temperatures by molecular dynamics simulations. *S. ISHIKAWA, H. SAKUMA and N. TSUCHIYA*
- 303** **Erratum**
