

Journal of Mineralogical and Petrological Sciences

October 2016

Volume 111, Number 5

Published by Japan Association of Mineralogical Sciences

ORIGINAL ARTICLES

- 305** Mineralogical characterization of radioactive particles from Fukushima soil using μ -XRD with synchrotron radiation. *S. MOTAI, H. MUKAI, T. WATANUKI, K. OHWADA, T. FUKUDA, A. MACHIDA, C. KURAMATA, R. KIKUCHI, T. YAITA and T. KOGURE*
- 313** Color-inducing elements and mechanisms in nephrites from Golmud, Qinghai, NW China: Insights from spectroscopic and compositional analyses. *H. YU, R. WANG, J. GUO, J. LI and X. YANG*
- 326** U-Pb ages and Hf isotopic composition of zircon and bulk rock geochemistry of the Dai Loc granitoid complex in Kontum massif: Implications for early Paleozoic crustal evolution in Central Vietnam. *P.T. HIEU, N.T. DUNG, NGUYEN T.B.T., N.T. MINH and P. MINH*
- 337** Geothermobarometry of amphiboles in intermediate to basic rocks from the Almogholagh pluton in western Iran. *M. AMIRI, A. AHMADI KHALAJI, Z. TAHMASBI, R. ZAREI SAHAMIEH and H. ZAMANIAN*
- 351** Internal texture and U-Th-total Pb isochron ages of monazite in metamorphic rocks from the Southwestern Highland Complex, Sri Lanka. *D.N.S. WANNIARACHCHI and M. AKASAKA*
- 363** Structural refinement of köttigite-parasymplesite solid solution: Unique cation site occupancy and chemical bonding with water molecules. *A. YOSHIASA, Y. MIYANO, H. ISOBE, K. SUGIYAMA, H. ARIMA, A. NAKATSUKA, K. MOMMA and R. MIYAWAKI*
