Vol. 28, No. 2, 2019

Solution Combustion Synthesis as a Novel Route to Preparation of Catalysts <i>Parthasarathi Bera</i>	77
Numerical Study on Filtration Combustion in Porous Two-Layer Systems: Influence of Fuel Porosity <i>T. P. Ivleva</i>	110
Time-Resolved X-Ray Diffraction in SHS Research and Related Areas: An Overview <i>D. Yu. Kovalev and V. I. Ponomarev</i>	114
SHS in the Ti–B System with Strongly Different Size of Ti Particles <i>M. A. Ponomarev and V. E. Loryan</i>	124
Synthesis of Oxynitride Ceramic by Forced Filtration Combustion in an Oscillation Regime <i>A. S. Maznoy and A. I. Kirdyashkin</i>	128
Structural and Dielectric Properties of Combustion-Synthesized Mn–Zn Nanoferrites <i>R. C. Bharamagoudar, J. Angadi, A. S. Patil, L. B. Kankanawadi, and S. N. Mathad</i>	132
TiZrNiCuAl and TiNbNiCuAl Alloys by Thermal Explosion and High-Energy Ball Milling <i>S. G. Vadchenko, A. S. Rogachev, D. Yu. Kovalev, I. D. Kovalev, and N. I. Mukhina</i>	137

Brief Communications

Strong Joining of Al ₂ O ₃ and Mo ₂ B ₅ Ingots during Metallothermic SHS <i>V. A. Gorshkov, N. V. Sachkova, and M. Yu. Shiryayeva</i>	143
Influence of High-Energy Ball Milling on SHS in the Ti–Ni System <i>N. A. Kochetov, A. S. Shchukin, and B. S. Seplyarskii</i>	146
Coflow Combustion of Granulated (Ti + C) + xAl ₂ O ₃ Mixtures: Combustibility Limits <i>B. S. Seplyarskii, R. A. Kochetkov, N. I. Abzalov, and T. G. Lisina</i>	149
Thermally Coupled SHS Process in a Hybrid System <i>A. G. Tarasov, R. A. Grigoryan, and I. A. Studenikin</i>	152
