Vol. 13, No. 1, 2019

Structure of Chemical Compounds. Spectroscopy

Theoretical Study of the Effect of Simultaneous Doping with Silicon, on Structure and Electronic Properties of Adamantane

Forough Kalantari Fotooh and Mehdi Atashparvar

1

Kinetics and Mechanism of Chemical Reactions. Catalysis

Atomic and Electronic Structure and Chemical Properties of Coatings Based on Gold and Nickel Nanoparticles Deposited on Graphite

M. V. Grishin, A. K. Gatin, N. V. Dokhlikova, N. N. Kolchenko, S. Yu. Sarvadii, and B. R. Shub

9

Morphology of Two-Component Nanocatalysts Based on Platinum and Organoboron Nanoparticles

V. A. Kharitonov, M. V. Grishin, S. A. Ulasevich, S. Yu. Sarvadii, and B. R. Shub

16

Intensification of Fast Chemical Processes at Interfaces of Two-Component Liquid Media in Tubular Turbulent Reactors

Al. Al. Berlin, S. A. Patlazhan, I. V. Kravchenko, K. Yu. Prochukhan, and Yu. A. Prochukhan

25

Kinetics and Mechanism of Flexible Nanoparticles-Catalyzed Piperidinolysis of Anionic Phenyl Salicylate: Flexible Nanoparticles: CTABr/M₂X/H₂O (M₂X = 4-MeOSaNa₂, 3-, 4-MeSaNa₂)

Norazizah Abdul Razak, Ibrahim Isah Fagge, Esam Abdulkader Elhefian, and Mohammad Niyaz Khan

32

Synthesis, Characterization, Computation of Global Reactivity Descriptors and Antiproliferative Activity of *N*-(4-nitrophenyl)Acrylamide

Emine Tanış, Nevin Çankaya, and Serap Yalçın

49

Thermal Decomposition of *N*-[2,2-Bis(methoxy-NNO-azoxy)ethyl]-4-Nitropyrazole

V. V. Zakharov, N. V. Chukanov, I. N. Zyuzin, V. V. Nedel'ko, and B. L. Korsunskii

62

A Study of the Regularities of the Solid-Phase Synthesis of Metal Stearates

A. A. Momzjakov, A. A. Zharov, K. S. Fadeeva, T. R. Deberdeev, A. A. Berlin, and R. Y. Deberdeev

68

Combustion, Explosion, and Shock Waves

Direct Numerical Simulation of Turbulent Combustion of Hydrogen–Air Mixtures of Various Compositions in a Two-Dimensional Approximation

V. Ya. Basevich, A. A. Belyaev, S. M. Frolov, and F. S. Frolov

75

Regularities and Mechanism of Formation of Aluminides in the TiH₂–ZrH₂–Al System

G. N. Muradyan, S. K. Dolukhanyan, A. G. Aleksanyan, O. P. Ter-Galstyan, and N. L. Mnatsakanyan

86

Chemical, Phase, and Structural Transformations in the Combustion of Mixtures with Tungsten Oxide with Aluminum

S. L. Silyakov and V. I. Yukhvid

96

Environmental Characteristics of Infrared Burners with a Catalytic Radiation Screen

N. Ya. Vasilik, A. V. Porsin, and V. M. Shmelev

101

Instability of Solid Propellant Combustion Waves with a Subsurface Temperature Maximum

V. G. Krupkin and G. N. Mokhin

107

Reaction Mechanism Study of Chemical Transformations in Combustion of MoO ₃ /TiO ₂ /Al/Si Mixtures of Termite Type	112
<i>V. A. Gorshkov, P. A. Miloserdov, and N. V. Sachkova</i>	
Energy-Saturated Metal Complexes	119
<i>M. A. Ilyushin, A. A. Kotomin, and S. A. Dushenok</i>	
Theoretical and Experimental Study of Cellular Modes of Filtration Combustion of Cylindrical Systems	139
<i>P. M. Krishenik, S. V. Kostin, N. I. Ozerkovskaya, and K. G. Shkadinskii</i>	
Estimating Chemical Conversion Rates for Composite Explosives on the Basis of Experimental Data on Pseudo-Ideal Detonation	145
<i>B. S. Ermolaev, A. A. Shevchenko, A. Yu. Dolgoborodov, and I. V. Maklashova</i>	

Electric and Magnetic Properties of Materials

Potential of Carbon, Silicon, Boron Nitride and Aluminum Phosphide Nanocages as Anodes of Lithium, Sodium and Potassium Ion Batteries: A DFT Study	156
<i>Zhihua Chen, Zehui Shao, Muhammad Kamran Siddiqui, Waqas Nazeer, and Meysam Najafi</i>	

Chemical Physics of Polymer Materials

Mixing of Biodegradable Polymeric Solutions under Ultrasonic Dispersion and Microwave Heating Conditions	165
<i>V. N. Gorshenev</i>	
Kinetics of Isoprene Polymerization in the Presence of the Catalytic System NdCl ₃ · nCH ₃ CH(OH)CH ₃ –Al(<i>i</i> -C ₄ H ₉) ₃ –Piperylene	170
<i>K. A. Tereshchenko, N. V. Ulitin, D. A. Shiyan, G. F. Al'metova, E. M. Zakharova, I. Sh. Nasyrov, and V. P. Zakharov</i>	
Method for Forming Porous Calcium–Phosphate Polymer Composites	177
<i>V. N. Gorshenev</i>	
Thermoplastic Aluminoborophosphate–Aniline Polycomplexes	184
<i>A. Yu. Shaulov, E. M. Nechvolodova, R. A. Sakovich, L. V. Vladimirov, A. V. Grachev, and L. A. Tkachenko</i>	

Chemical Physics of Nanomaterials

Theory of Sensitivity of Nanoscale-Structured Layers of Metal Oxides to Reducing Gases	190
<i>V. L. Bodneva, M. A. Kozhushner, V. S. Posvyanskii, and L. I. Trakhtenberg</i>	
SWCNT as a Model Nanosensor for Associated Petroleum Gas Molecules: Via DFT/B3LYP Investigations	196
<i>Fouad N. Ajeel, Mohammed H. Mohammed, and Alaa M. Khudhair</i>	
Drift Mechanism of Formation of Metal Nanowires in Liquid Helium	205
<i>S. V. Stovbun and A. A. Skoblin</i>	

Chemical Physics of Atmospheric Phenomena

Ice Particle Formation in the Lower Stratosphere	214
<i>A. E. Aloyan, A. N. Yermakov, and V. O. Arutyunyan</i>	
Solid Products of NO ₃ Uptake on Methane Soot	219
<i>V. V. Zelenov, E. V. Aparina, V. I. Kozlovskiy, I. V. Sulimenkov, D. A. Kardonsky, and A. E. Nosyrev</i>
