

Vol. 52, No. 5, 2018

A simultaneous English language translation of this journal is available from Pleiades Publishing, Ltd.
Distributed worldwide by Springer. *High Energy Chemistry* ISSN 0018-1439.

Photochemistry

Spontaneous Structure Formation in the Products of UV-Initiated Formose Reaction
in De-Novo Model

*S. V. Stovbun, A. M. Zanin, M. G. Mikhaleva, A. A. Skoblin, V. A. Tverdislov,
O. P. Taran, and V. N. Parmon*

369

Photoinduced Oxidation of Water with Potassium Persulfate in the Presence
of Ruthenium Trinuclear Complex

T. S. Dzhabiev, Z. M. Dzhabieva, V. V. Dobrygin, E. N. Kabachkov, and L. I. Tkachenko

373

Photoreduction of 9,10-Phenanthrenequinone in the Presence of Dimethacrylate
Oligomers and Their Polymers

*N. A. Len'shina, M. Yu. Zakharina, R. S. Kovylin, M. A. Baten'kin, T. I. Kulikova,
M. V. Arsen'ev, and S. A. Chesnokov*

378

Photonics

Modeling of Charge Transfer Excited States of Titanocene Dicarboranyl

G. V. Loukova, A. A. Milov, V. P. Vasiliev, and V. I. Minkin

384

Excited Electron–Hole States in Molecular Chains

V. A. Benderskii and E. I. Kats

390

Autoionization of Excitons in Organic Solar Cells

V. A. Benderskii and E. I. Kats

400

Radiation Chemistry

Surface Energy Characteristics of Polytetrafluoroethylene Bombarded with MeV Protons

*I. F. Shaimukhametova, S. R. Allayarov, S. A. Bogdanova, G. P. Belov,
K. D. Semavin, S. V. Demidov, and D. A. Dixon*

407

Electron-Beam Processing of Petroleum Sludge

P. K. Metreveli, A. K. Metreveli, A. V. Ponomarev, and Yu. S. Pavlov

414

Radiation Stability of Copper Films under Irradiation with He²⁺ Ions

M. E. Kaliekperov, A. L. Kozlovskii, M. V. Zdorovets, and D. I. Shlimas

419

Plasma Chemistry

Simulation of Gas-Dynamic and Thermal Processes in Vortex-Stabilized,
Inductively Coupled Argon–Hydrogen Plasma

L. V. Shabarova, R. A. Kornev, and P. G. Sennikov

423

Reduction–Oxidation of Chromium Ions in Aqueous Solution by Treatment
with Atmospheric-Pressure Direct-Current Discharge in Argon

D. A. Shutov, A. V. Sungurova, A. S. Manukyan, and V. V. Rybkin

429

Nanosized Structures and Materials

Comparative Characterization of Relaxed Organic–Inorganic Hybrid Perovskite Structures Using Molecular Dynamic Simulation and X-ray Diffraction Data

*T. Yu. Zelenyak, Kh. R. Rakhmonov, Kh. T. Kholmurodov,
P. P. Gladyshev, and A. R. Tameev*

433

Modification of Weld Metal with Tungsten Carbide and Titanium Nitride Nanoparticles in Twin Submerged Arc Welding

*N. P. Aleshin, M. V. Grigor'ev, N. V. Kobernik, R. S. Mikheev, A. S. Pankratov,
A. V. Samokhin, N. V. Alekseev, and M. A. Sinaisky*

440

Chemiluminescence

The Quantum Yield of Singlet Oxygen in Thermal Degradation of Alcohol Hydrotrioxides

L. R. Khalitova, A. V. Antipin, S. A. Grabovskii, and N. N. Kabal'nova

446

Short Communications Radiation Chemistry

Radiation-Induced Aggregation and Dehydration of Phytoplankton

V. N. Chulkov, A. V. Bludenko, and A. V. Ponomarev

449
