Metallothermic SHS in Conditions of Artificial Gravity: Mathematical Modeling <i>D. E. Andreev, K. G. Shkadinsky, N. I. Ozerkovskaya, P. M. Krishenik, and O. A. Golosova</i>	217
Combustion of Gasless Systems: Thermocapillary Convection of Metal Melt <i>O. V. Lapshin and V. G. Prokof'ev</i>	221
Solution Combustion Synthesis of ZnO Using Binary Fuel (Glycine + Citric Acid) <i>Sh. M. Khaliullin, V. D. Zhuravlev, L. V. Ermakova, L. Yu. Buldakova, M. Yu. Yanchenko, and N. M. Porotnikova</i>	226
SHS Reprocessing of Copper Oxide Waste into Copper Powder <i>H. A. Mahmoudi, L. S. Abovyan, S. V. Aydinyan, and S. L. Kharatyan</i>	233
Thermodynamic Analysis of the CaO–Y <sub>2</sub> O <sub>3</sub> –ZrO <sub>2</sub> –Ti–Fe <sub>2</sub> O <sub>3</sub> System as a Precursor for SHS-Produced Pyrochlore-Based Ceramics <i>K. B. Podbolotov, T. V. Barinova, B. B. Khina, and M. V. Velichko</i>	239
Electron Beam Assisted Deposition of Ni–Al Coatings onto Steel Substrate <i>A. A. Bakinovskii, A. G. Knyazeva, M. G. Krinitcyn, O. N. Kryukova, I. L. Pobol, V. V. Fedorov, and J. Rajczyk</i>	245
Porous Ni–Al–CGO Cermet for Use in Solid Oxide Fuel Cells <i>A. A. Solovyev, A. S. Maznoy, K. A. Kuterbekov, S. A. Nurkenov, S. Opakhai, A. I. Kirdyashkin, V. D. Kitler, N. S. Pichugin, S. V. Rabotkin, and I. V. Ionov</i>	256
SHS of Ti <sub>3</sub> SiC <sub>2</sub> -Based Materials in the Ti–Si–C System: Impact of Silicon Excess <i>J. Lis, L. Chlubny, K. Witulska, P. Borowiak, K. Kozak, A. Misztal, and O. Czajkowska</i>	262
Single Step Solution–Combustion Synthesis of Magnetically Soft NiFe <sub>2</sub> O <sub>4</sub> Nanopowders with Controllable Parameters <i>A. D. Martinson, I. A. Cherepkova, I. B. Panteleev, and V. I. Popkov</i>	266

## Brief Communications

Effect of Aluminum Doping on Structural and Mechanical Properties of Ni–Mg Ferrites <i>S. S. Gundhad, P. M. Patil, S. N. Mathad, L. V. Hublikar, P. R. Jeergal, and R. B. Pujar</i>	271
Mo-Based Composites Reinforced with Nb, Si, and B by Metallothermic SHS under Artificial Gravity <i>Yu. S. Yelovin, D. E. Andreev, and V. I. Yuxhvid</i>	274
Combustion of Granulated Ni–Al Mixtures: Influence of Mechanoactivation Time <i>N. A. Kochetov and B. S. Septyarskii</i>	276
Heusler Phases Ni <sub>2</sub> AlM (M = Ti, Zr, Hf, Nb) by SHS Method <i>K. Sidnov and D. S. Belov</i>	279
