Chemistry Authors Up Close

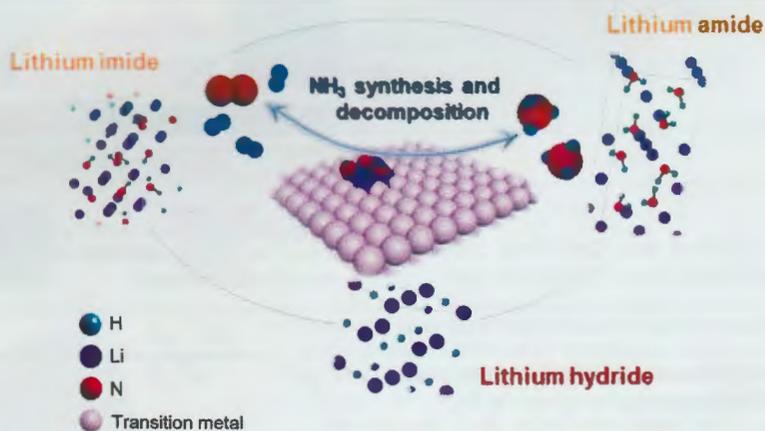

431  
Nickel Catalyzed Functionalization of Allenes

Yang Liu, Marco Bandini\*

The latest findings in the Ni catalyzed/promoted organic manipulations of allenes and allene derivatives are presented herein.

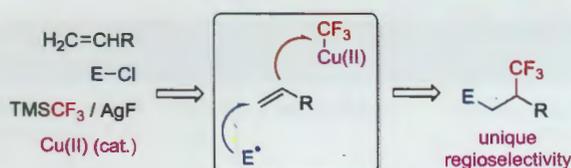

442  
Hydrides, Amides and Imides Mediated Ammonia Synthesis and Decomposition

Wenbo Gao, Jianping Guo,\* Ping Chen\*

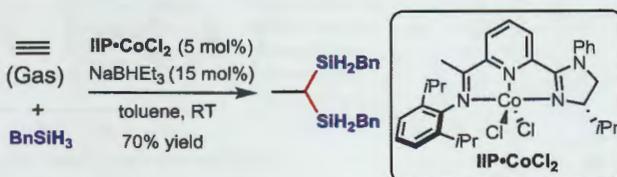

Breaking Reports

452  
Copper-Catalyzed Carbotrifluoromethylation of Unactivated Alkenes Driven by Trifluoromethylation of Alkyl Radicals

Zhenzhen Zhang, Lin Zhu, Chaozhong Li\*

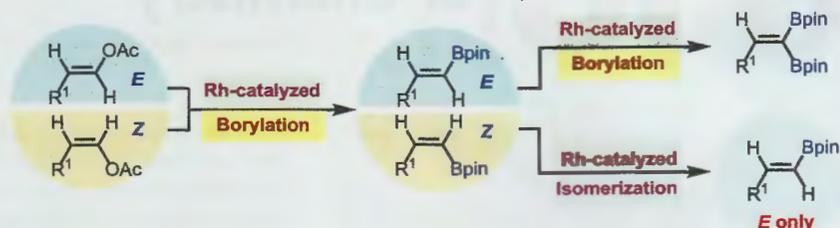

457  
Highly Regioselective Sequential 1,1-Dihydrosilylation of Terminal Aliphatic Alkynes with Primary Silanes

Zhaoyang Cheng, Shipai Xing, Jun Guo, Biao Cheng, Lan-Fang Hu, Xing-Hong Zhang, Zhan Lu\*

462

Stereoselective Synthesis of Vinylboronates by Rh-Catalyzed Borylation of Stereoisomeric Mixtures

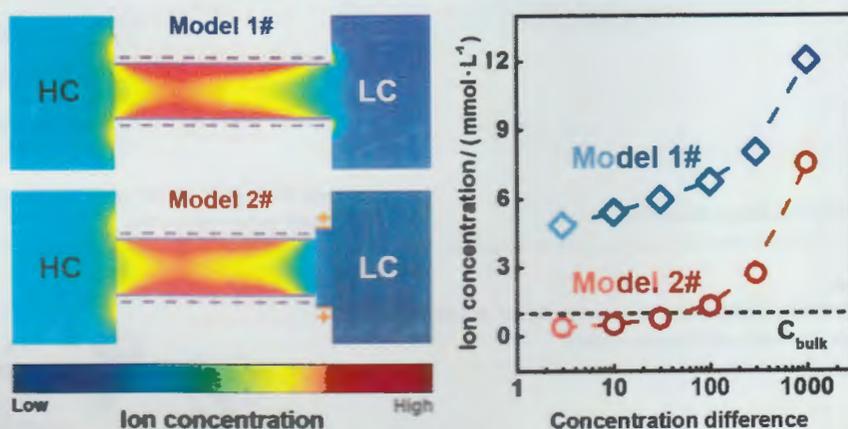

A variety of (*E*)-vinylboronates and vinyl diboronates were prepared via rhodium-catalyzed borylation of an *E/Z* mixture of vinyl esters. Mechanistic studies indicated that the mechanism involved a borylation-isomerization sequence. The *Z* to *E* isomerization of the vinylboronates was also demonstrated.

Shenhuan Li, Jie Li, Tianlai Xia, Wanxiang Zhao\*

469

On the Role of Heterogeneous Nanopore Junction in Osmotic Power Generation

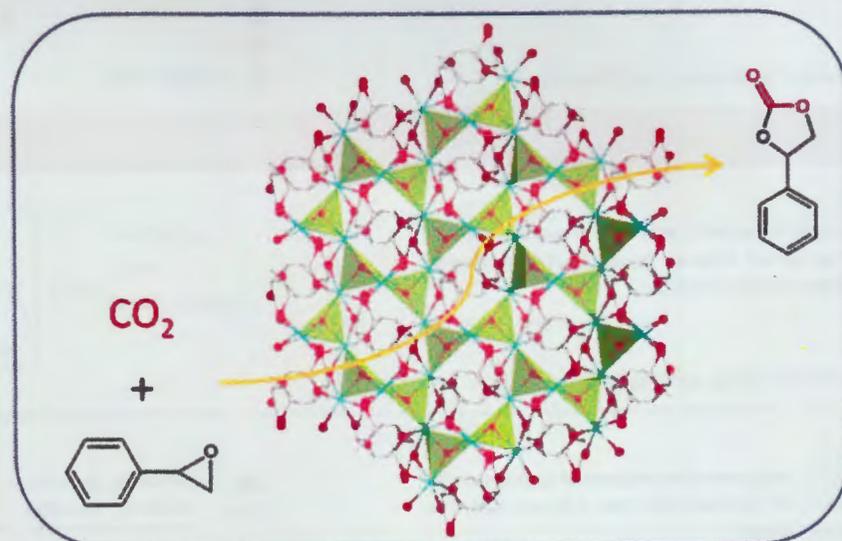

Hao Li, Feilong Xiao, Gang Hong, Jianjian Su, Ning Li, Liuxuan Cao,\* Qi Wen,\* Wei Guo\*

Ion concentration polarization can be effectively suppressed by heterogeneous nanopore junction at the low-concentration end. With appropriately optimized parameters, the overall performance can be greatly enhanced.

474

[Zn<sub>4</sub>O] Cluster-Based Metal-Organic Frameworks as Catalysts for Conversion of CO<sub>2</sub>

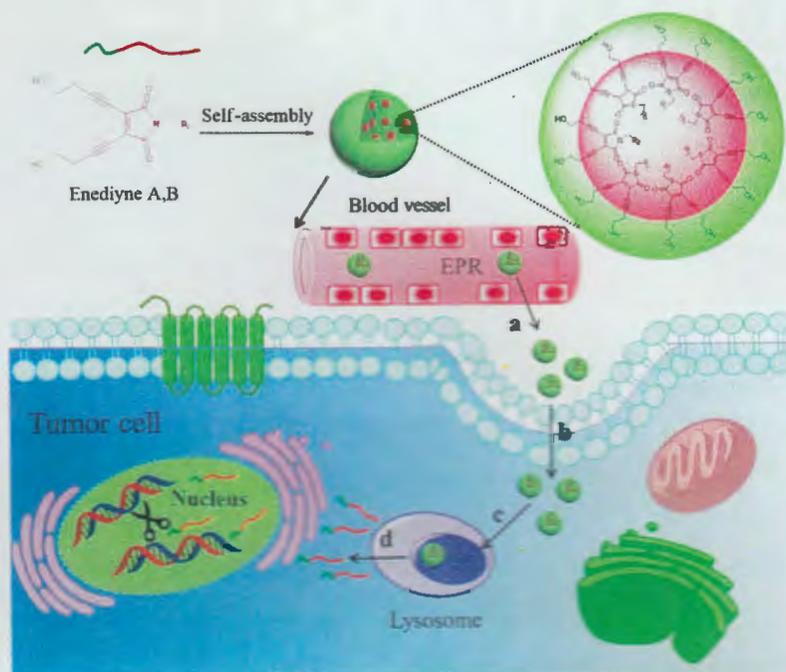

One new two-dimensional [Zn<sub>4</sub>O] cluster-based MOF can serve as an efficient and recyclable heterogeneous catalyst to catalyze CO<sub>2</sub> coupling with epoxides into cyclic carbonates under mild conditions.

Wanzhen Qiao, Tianqun Song, Bin Zhao\*

479

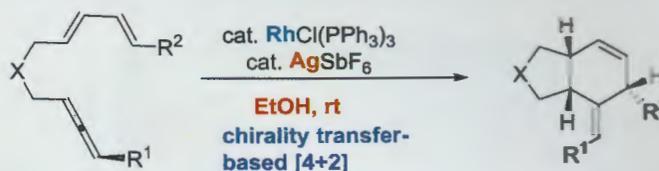

## Self-Delivery Nanoparticles of Amphiphilic Acyclic Eneidyne for Efficient Tumor Cell Suppression

Jing Li, Yuequn Wu, Lili Sun, Shuai Huang, Baojun Li, Yun Ding, Aiguo Hu\*

486

## One Stone for Three Birds-Rhodium-Catalyzed Highly Diastereoselective Intramolecular [4+2] Cycloaddition of Optically Active Allene-1,3-dienes

Rhodium-catalyzed intramolecular [4+2] cycloaddition of optically active allene-1,3-dienes afforded bicyclic products in excellent stereoselectivity.

Yulin Han, Anni Qin, Shengming Ma\*

497

Copper-Bismuth Bimetallic Microspheres for Selective Electrocatalytic Reduction of  $\text{CO}_2$  to Formate

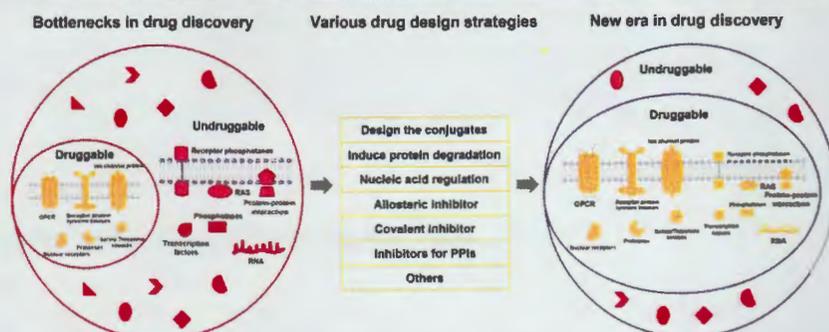

Bimetallic Cu-Bi  $\text{CO}_2$ RR electrocatalysts were prepared via the cathodic conversion of hierarchical  $\text{CuBi}_2\text{O}_4$  microspheres. They enabled the high-performance electrocatalytic reduction of  $\text{CO}_2$  to formate with large current density, excellent selectivity, and sufficient durability.

Lin Jia, Hui Yang, Jun Deng, Junmei Chen, Yuan Zhou, Pan Ding, Leigang Li, Na Han,\* Yanguang Li\*

## Recent Advances

501

## Drug Design of "Undruggable" Targets

Jie Wang, Shiliang Li, Honglin Li\*

Drug design strategies against "undruggable" targets.

513  
Recent Advances in Constructing Nitrogen-Containing Heterocycles via Electrochemical Dehydrogenation

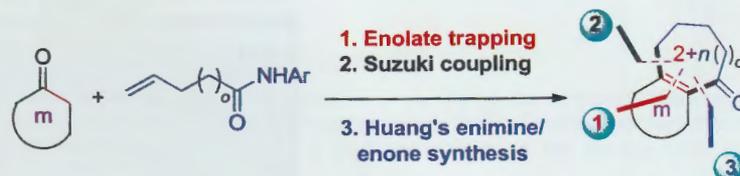

- External Oxidant-Free**
- Environmentally Friendly**
- Innately Scalable**
- Mild Conditions**
- Functional Group Tolerant**
- Enabling New Reactivity**

Zenghui Ye, Fengzhi Zhang\*

In this paper, we summarize the most recent advances in constructing nitrogen-containing heterocycles by electrochemical dehydrogenation.

Inside Story

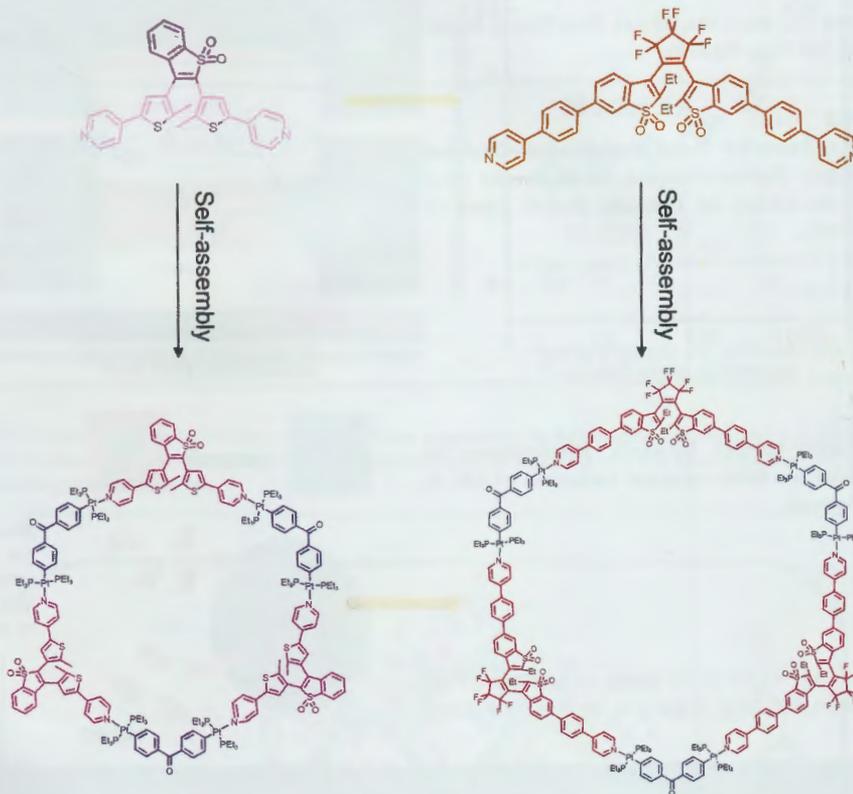

529  
Polycyclic Structure Synthesis via a Three-step “[2+n]” Annulation

Qian He, Dong-Ping Wu\*

Recently, we developed a new strategy for the synthesis of polycyclic structure via a three-step “[2+n]” annulation protocol from simple cycloketones and terminal olefinic amides.

531  
From the Photochromic Metallacycles to the “Turn-On” Photo-Switchable Fluorescent Metallacycles

Yi Qin\*

Developing from the photochromic metallacycles to the “turn-on” photo-switchable fluorescent metallacycles.
