Vol. 29, No. 3, 2020

Melting Points of Refractory SHS Products: Evaluation by Molecular Dynamics Methods <i>S. A. Rogachev</i>	133
SHS in the Si–CO ₂ System: Composition/Structure of Combustion Products <i>T. V. Barinova, V. Yu. Barinov, V. N. Semenova, and I. D. Kovalev</i>	138
Mo ₅ SiB ₂ -Based Ceramics by Forced SHS Compaction and Hot Pressing of SHS-Produced Powders: Features of Phase-Formation Processes <i>A. Yu. Potanin, Yu. S. Pogožhev, S. I. Rupasov, A. V. Novikov, and D. Yu. Kovalev</i>	143
High-Temperature Synthesis of Ti–Si–B and Ti–Al–B Composites and Coatings <i>O. K. Lepakova, N. I. Karakchieva, N. N. Golobokov, N. K. Gal'chenko, and N. I. Afanas'ev</i>	150
Cobalt-Doped Nickel Zinc Nanoferrites by Solution-Combustion Synthesis: Structural and Elastic Parameters <i>G. M. Shweta, L. R. Naik, R. B. Pujar, and S. N. Mathad</i>	157
Mechanoactivated SHS in the Ti–Ni System: Influence of Preheating Temperature <i>N. A. Kochetov and B. S. Seplyarsii</i>	162
Corrosion Behavior of SHS-Produced Cu–Ti–B Composites <i>S. A. N. Mehrabani, A. T. Tabrizi, H. Aghajani, and H. Pourbagheri</i>	167
Convection-Driven Combustion of Ti–C Granules in the Absence of External Gas Flow <i>B. S. Seplyarsii, R. A. Kochetkov, T. G. Lisina, and N. I. Abzalov</i>	173
Al-Doped Co–Cd Nanoferrites by Solution-Combustion Synthesis: Preparation and Structural Characterization <i>L. C. Shidaganal, A. B. Kulkarni, S. B. Kapatkar, S. N. Mathad, and R. B. Pujar</i>	176

Brief Communications

Mechanically Activated SHS of Nb–Ti–Si Compounds <i>R. Trevino and E. Shafirovich</i>	181
Strengthening Protective Boride Coatings with SHS-Produced Fe ₂ Al ₅ <i>V. F. Aulov, Yu. N. Rozhkov, S. L. Silyakov, and V. I. Yukhvid</i>	184
