

Contents

Vol. 15, Suppl. 2, 2021

Structure of Chemical Compounds, Quantum Chemistry, Spectroscopy

Enhanced Elimination of Methyl Orange and Recycling of an Eco-Friendly Adsorbent Activated Carbon from Aqueous Solution

*El. H. EL Khattabi, Y. Rachdi, R. Bassam, E. H. Mourid,
Y. Naimi, M. EL Alouani, and S. Belaaouad*

S149

Influence of Electron Donor and Acceptor Groups (Push-Pull System) on Structure. Electronic and Optical Properties of [22] Annulene

S. M. Atyabi, H. R. Shamlouei, E. Asgari, and G. M. Roozbahani

S160

Synthesis and Spectroscopic Characterizations of Tb³⁺ doped K₂La(PO₃)₅ Luminophores

L. Ajili, M. Férid, and K. Horchani-Naifer

S173

Research on the Electronic Properties of Tyrosine Dipeptide Molecule: Evaluation of the First-principles Theory

S. Wang and M. Li

S181

Chemical Physics of Biological Processes

Kinetics, Equilibrium and Thermodynamic Investigation of New Coccine Adsorption onto Chitosan 10B in Aqueous Solution

M. Islam, P. Ghosh, S. Karmaker, and T. K. Saha

S189

Chemical Physics of Polymer Materials

Experimental Standard Enthalpies of Formation of 4,4'-Methylenedi(phenylene isocyanate) and Polyamide-imides

*M. López-Badillo, M. A. García-Castro, J. A. Galicia-Aguilar, R. J. Aranda-García,
E. Galicia-Hernández, and M. A. Velasco-Hernández*

S201
