

Contents

Vol. 16, No. 4, 2022

Structure of Chemical Compounds, Quantum Chemistry, Spectroscopy

A Comparative Study of Nitrate and Iodide of the Spin-Variable Iron(III) Cation with the N_4O_2 Coordination Sphere by Mössbauer Spectroscopy

N. G. Spitsyna, N. S. Ovanesyan, and M. A. Blagov 565

Molecular Dynamic Investigation of HN_2ON a Potential Energy Surface Designed by Lie Algebra Method

Ali H. Moussa, M. Shalaby, El-Wallid S. Sedik, M. Tag El-Din Kamal, and H. Talaat 572

A B3LYP/DFT Study on the Structure Activity Relationship for Benzimidazole Derivatives in Water Solution

Z. H. Al-Sawaff, M. A. Basaran, and F. Kandemirli 579

Comparative Analysis of Interaction Mode between MABA and Silver Nanoparticles in the Silver Colloidal Solution

Z. Tao, M. Zhu, J. Ding, D. Jiang, and B. Yan 590

Kinetics and Mechanism of Chemical Reactions, Catalysis

Influence of Quartz on The Storage of Hydrogen Fluorine Mixtures

V. Ya. Agroskin, B. G. Bravy, G. K. Vasiliev, V. I. Guriev, S. A. Kashtanov, E. F. Makarov, S. A. Sotnichenko, and Yu. A. Chernyshev 596

H/D Kinetic Solvent Isotope Effect in the Oxidation of Methyl Linoleate in Triton X-100 Micelles

I. V. Moskalenko and I. V. Tikhonov 602

Selectivity of Ethylaluminium Dichloride–Proton Donor Complex Catalysts from the C_4 Fraction in Initiating the Oligomerization of Isobutylene

G. E. Zaikov, M. I. Artsis, D. S. Andreev, and A. V. Ignatov 606

Thermal Decomposition of 1-[2,2-Bis(Metoxy-NNO-Azoxy)Ethyl]-3,4-Dinitro-1H-Pyrazole

B. L. Korsunskiy, V. V. Zakharov, T. S. Larikova, I. N. Zyuzin, N. V. Chukanov, and V. V. Nedel'ko 615

Combustion, Explosion, and Shock Waves

The Effect of the Magnesium Content and Mechanical Activation on Combustion in the Ni + Al + Mg System

N. A. Kochetov 621

Ignition, Combustion, and Detonation of Gas-Phase and Heterogeneous Mixtures (*Review*)

V. N. Mikhalkin, S. I. Sumskoj, A. M. Tereza, K. Y. Troshin, B. A. Khasainov, and S. M. Frolov 629

Investigation of the Radiation Characteristics of High-Temperature Gases in Shock Tubes

G. Ya. Gerasimov, P. V. Kozlov, I. E. Zabelinsky, N. G. Bykova, and V. Yu. Levashov 642

Registration of the Ignition of A Combustible Mixture in a Shock Tube Using a Thermoelectric Detector	
<i>P. A. Kotov, P. V. Kozlov, G. Ya. Gerasimov, V. Yu. Levashov, A. N. Shemyakin, N. G. Solovyov, M. Yu. Yakimov, V. N. Glebov, G. A. Dubrova, and A. M. Malyutin</i>	655
Evolution of the Reaction Front Shape and Structure on Flame Acceleration and Deflagration-to-Detonation Transition	
<i>P. N. Krivosheyev, A. O. Novitski, and O. G. Penyazkov</i>	661
Characteristic Analysis of the Dynamics of Shock Wave Propagation in a Medium with a Nonuniform Density Distribution	
<i>Ya. E. Poroshyna, A. I. Lopato, and P. S. Utkin</i>	670
Combustion of Layered Condensed Media Taking Into Account the Diffusive Mixing of Reagents	
<i>S. A. Rogachev, K. G. Shkadinskii, and P. M. Krishenik</i>	680
Numerical Simulation of Autoignition Characteristics of Lean Hydrogen–Air Mixtures	
<i>A. M. Tereza, G. L. Agafonov, E. K. Anderzhanov, A. S. Betev, S. P. Medvedev, and S. V. Khomik</i>	686
Initiation of Hydrogen–Air Mixtures with Metallic Rh and Hydrogen–Methane/Ethane/Ethylene–Air Mixtures with Pd and Rh at Pressures of 1–2 atm	
<i>K. Ya. Troshin, N. M. Rubtsov, G. I. Tsvetkov, V. I. Chernysh, and I. O. Shamshin</i>	693
Initiation of Stable Detonation Combustion of Kerosene Vapors behind an Oblique Shock Wave in a Rarefied Atmosphere	
<i>Yu. V. Tunik, G. Ya. Gerasimov, V. Yu. Levashov, V. O. Mayorov, and M. C. Assad</i>	699
Spherical Shock Wave Attenuation by Perforated Partitions in a Conical Shock Tube	
<i>S. V. Khomik, A. N. Ivantsov, S. P. Medvedev, E. K. Anderzhanov, I. V. Guk, A. I. Mikhailin, M. V. Silnikov, S. N. Vasilieva, and A. M. Tereza</i>	706
Thermodynamic Evaluation of Wood Tars' Oxy-Conversion with the Production of Hydrogen and Synthesis Gas	
<i>M. V. Tsvetkov, V. M. Kislov, Yu. Yu. Tsvetkova, A. Yu. Zaichenko, D. N. Podlesniy, I. V. Sedov, and E. A. Salgansky</i>	711

Physical Methods for Investigation of Chemical Processes

Physico-Chemical Study of Coked Catalyst Particles Obtained from Hydrocracking
Process of Heavy Oil Residues with Natural Alumosilicates

A. B. Hasanova and G. S. Mukhtarova 717

Chemical Physics of Biological Processes

Possible Mechanisms of 4-Hexylresorcinol Influence on DNA and DNA–Dps
Nanocrystals Affecting Stress Sustainability of *Escherichia coli*

E. V. Tereshkin, N. G. Loiko, K. B. Tereshkina, V. V. Kovalenko, and Y. F. Krupyanskii 726

Chemical Physics of Ecological Processes

Spatiotemporal Profiles of the Concentrations of Contaminants
During Electrokinetic Remediation of Soils

*I. V. Kumpanenko, N. A. Ivanova, N. Yu. Kovaleva, N. A. Sakharova,
O. V. Shapovalova, and A. V. Roshchin* 738

Oxidation of Nitrated Cellulose by the Microbial Community of Active Sludge

E. A. Saratovskikh, L. V. Avdeeva, V. A. Shcherbakova, and R. N. Yarullin 747

Chemical Physics of Polymer Materials

Topological, Micromolecular, and Supramolecular Structure of Ethylene-Propylenediene
Elastomers and Patterns of their Combination with Nitrile Butadiene Rubbers

N. M. Livanova, V. A. Hasova, E. S. Pravada, Yu. O. Andriasyan, and A. A. Popov 756

Highly Filled Composite Materials Based on UHMWPE and a Mixture
of Micron and Nanoscale Aluminum Particles

*O. I. Kudinova, P. A. Nezhnyi, V. G. Grinev, N. G. Ryvkina, V. G. Krashennnikov,
N. G. Berezkina, T.A. Ladygina, and L. A. Novokshonova* 764

Chemical Physics of Nanomaterials

Modelling Hydrogen Adsorption on a Copper Nanoparticle Deposited
on a Graphite Substrate with Various Defects

*N. V. Dokhlikova, A. K. Gatina, S. Yu. Sarvadiy, S. A. Ozerin,
E. I. Rudenko, M. V. Grishin, and B. R. Shub* 772

Transmission Electron Microscopy: Study of the Bimetallic Nanoparticle Features

N. S. Zakharov, A. N. Popova, Yu. A. Zakharov, V. M. Pugachev, and D. M. Russakov 780

Preparation of Magnesium Aluminate Spinel Nanofibers with High Temperature Resistance
by Electrospinning Process Based on Non-Hydrolytic Sol-Gel Method

K. Xu, Yi. Cui, Y. Yu, H. Wei, H. Wang, Y. Wei, Y. Chen, D. Lv, Y. Yu, and J. Bu 787

Photoelectron Properties of Multi-Walled and Single-Walled Titania Nanotubes

*E. A. Konstantinova, E. V. Kytina, V. B. Zaitsev, M. N. Martyshov,
T. P. Savchuk, and M. F. Kamaleev* 797

Reactions on Surface

A DFT Study on the Adsorption of Carboxyl-Containing Monomers on CH (001) Surface

X. Miao, S. Zhou, and C. Wang 804
