

Journal of Mineralogical and Petrological Sciences

June 2017

Volume 112, Number 3

Published by Japan Association of Mineralogical Sciences

ORIGINAL ARTICLES

- 109** Abuite, $\text{CaAl}_2(\text{PO}_4)_2\text{F}_2$, a new mineral from the Hinomaru-Nago mine, Yamaguchi Prefecture, Japan. *S. ENJU and S. UEHARA*
- 116** Precipitates within olivine phenocrysts in oxidized andesitic scoria from Kasayama volcano, Hagi, Japan. *T. EJIMA, M. YONEDA, M. AKASAKA, H. OHFUJI, Y. KON, M. NAGASHIMA and Y. NAKAMUTA*

LETTERS

- 127** Sintering nanocrystalline diopside from pulverized diopside crystals. *Y. TSUBOKAWA and M. ISHIKAWA*
- 132** Carbonic fluid inclusions in a garnet-pyroxene granulite from Austhovde in the Lützow-Holm Complex, East Antarctica: Implications for a decompressional P - T path. *K. TAKAHASHI and T. TSUNOGAE*

Journal of Mineralogical and Petrological Sciences is the successor journal to both "Journal of Mineralogy, Petrology and Economic Geology" and "Mineralogical Journal".
